1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. This rejection is repeated for reasons of record.

2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. For the reasons set forth above, the terms "swellable porous inkjet recording medium" and "swellable porous ink receiving layer(s)" are confusing because they defy art recognized meanings of the terms "swellable" and "porous" and are not defined in the specification. One of ordinary skill in the art would not be able to determine the metes and bounds of applicants' claims. They could not determine how much resin would be considered enough to render the medium "swellable" and how many pores would be too few to render the medium "porous." Clarification is required.

3. Claims 3-7, 9-13 and 16-21 are allowed. However, it is suggested that the phrase "essentially capable" be changed to "capable" in each of claims 16 and 21 to further clarify the claim language.

4. Applicants' amendments are persuasive in overcoming the rejections of record.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pamela Schwartz whose telephone number is (571) 272-1528.
